- Supply and install 384m² of 10mm pile of artificial grass suitable for sports use.
- Supply and install a 14 to 25kg/sqm sand infill
- Provisions throughout the duration of the works including welfare, plant, machinery, security fencing and fuel surcharges

Subtotal for above works:	£31,413.40
VAT:	£6,282.60
Total:	£37,695.60

Product info and maintenance

Rhyno Grass is a dense, tufted and sand dressed product made of textured polyethylene monofilaments with narrow blades. Perfect for MUGA projects, play areas, games areas, exhibitions, events, balconies, office environments.

Available in 9 different colours, it is a 10mm short curly pile product, requiring a sand infill of [14 to 25] kg/sqm. Our 10mm Rhyno Play Pad should be used beneath.

Artificial turf is a popular choice for football and training pitches because it's highly durable and allows a high volume of usage with minimum maintenance. Synthetic grass is often more comfortable for players because of the increased shock absorption, especially when playing on

Vita Play Limited
 Woodhams Farm New Barn, Springvale Road
 Kings Worthy
 Winchester, SO23 7LB

VAT Number 977 4787 42
 Company Number 7437573

 Email: info@vitaplay.co.uk
 Web: www.vitaplay.co.uk

The Rhino sports grass will be laid in 4m wide strips and carries a warrantee of 5 years.

should there be any vandalism or unintentional damage to the playing surface

repairs will be carried out in sections and left as previously installed.

Remember that artificial grass is LOW maintenance not NO maintenance!

There are a few simple steps that can be taken to ensure your artificial grass product remains in the best condition for its lifetime. The trick is little and often and with this attitude, you will avoid an unwanted expense of restoring the grass earlier than would have been necessary.

Brushing the pile

For this step, you will require a stiff brush, leaf blower or rotating/power brush. Using one of these items regularly will help to rejuvenate any areas that might have flattened slightly. For best results push against the grass in the opposite direction to where it is leaning. For best results we recommend using a power brush or petrol leaf blower.

Leaves and other debris

All debris should be removed from the Artificial Grass surface, whether it's leaves or other debris. Leaving rotting vegetation and other organic matter is not ideal as it can build up and affect drainage. All you require for this step is again a stiff brush, leaf blower, rotating/power brush. Larger debris can be picked up by hand.

Weeds

Our installation includes a weed membrane beneath the grass to avoid unwanted weeds and airborne seeds embedding in the grass. Rhino sports grass products have drainage holes in the backing to allow for drainage, which is why it is so important for a weed barrier to be placed directly below the grass. Should any moss or weeds appear, ensure that only a water-based weed killer is used.

General Notes:

- All prices shown are Pounds Sterling and fully inclusive of delivery of materials and labour
- All safety surfacing is installed to BSEN:1177
- Quotation is valid for 14 days from date of issue
- Unless otherwise shown, all prices are **exclusive** of VAT at the prevailing rate
- Payment terms are 14 days from date of invoice
- Full T&Cs available upon request
