## Overhaul of 2 Bay Swing Set at Lion Green Project

### Background:

It has been identified during recent playground inspections that the top bar swing hangers and shackles are showing excessive wear. There is also some chain wear and the 3 flat swing seats are cracked and need replacing. There has not been any overhaul, repairs or servicing to this equipment for a very long time therefore, from a safety point of view it is important that this overhaul is carried out as soon as possible.
