

# HASLEMERE TOWN COUNCIL

## **STURT FARM SANG – DOG BIN WASTE COLLECTION**

### **BACKGROUND**

- Under the terms of the SANG management plan, Council must arrange for two dog waste bins to be emptied on a fortnightly basis. The locations are shown as blue dots on the plan below.
- The upper most one is close to the footpath and access and will be straightforward to empty.
- The lower bin will require a contractor to walk for circa 20 minutes across the SANG to retrieve the waste and then carry it back to his vehicle. Our current contractor has said that they would **not** be able to take the job on with the second bin in it's current location.
- If Council were to agree to the moving of the lower bin to the location marked yellow they could.

**RECOMMENDATION:** The lower bin be moved to the location marked by a yellow dot on the plan and Continental be instructed to empty both bins for £368 per annum.
