

# HASLEMERE TOWN COUNCIL

## **Landscaping at the public toilets at Lion Green**

### **BACKGROUND**

Now that the public toilets on Lion Green are close to completion, consideration needs to be given to the outside planting. The committee should note that this work extends only to the external planting around the new toilet block.

**RECOMMENDED:** That the committee forms a small working party to make a recommendation to March full council regarding the planting scheme. The working party may consider inviting ideas from people who have stated an interest in helping with the design. The council's grounds care contractor, who will be doing the work, should also be approached for ideas. Any modifications to the unit itself, for instance painting or cladding of the exterior, is out of scope at this time and is to be thought about later in the year, once the planting has had a chance to establish, and the whole scheme has had a chance to 'bed in'.
